Section 1 Grundisburgh Profile

1.1 Introduction

- 1.1.1 Many small settlements are home to vulnerable groups experiencing particular deprivation issues. Information at settlement level can help target programmes run by mainstream providers, as well as helping local communities with the evidence-base to support the development of community and parish plans and strengthening local funding applications.
- 1.1.2 This short area profile is based on detailed *Output Area* datasets developed and collected by Oxford Consultants for Social Inclusion¹. We have used the Office for National Statistics Output Area definitions of settlements to develop these profiles.
- 1.1.3 Grundisburgh lies in Suffolk Coastal district, and at the time of the 2001 Census had a population of 1288.

1.2 Population

- 1.2.1 Population size and composition are crucial elements in any attempt to identify, measure and understand social exclusion. It is important to know how many people live within a settlement, and their characteristics such as age and sex. Additional information such as ethnic composition, as well as the numbers of children and older people, add further valuable context to the analysis.

1.3 Population Characteristics

Key Population Groups²

- 1.3.1 Although it is not possible to identify social exclusion issues from population counts of key communities, this information can help identify concentrations of people who may be particularly 'at-risk' of social exclusion and deprivation.

¹ These datasets were developed as part of the "Deprivation in Rural Norfolk" project, see OCSI (2006). *Deprivation in Rural Norfolk*.

² The denominator for lone parent households with dependent children is all households with dependent children. The denominator for lone pensioner households is all pensioner households.

1.4 Multiple Deprivation

1.4.1 The Index of Multiple Deprivation 2004 (IMD 2004) is based on seven separate "domains" of deprivation - income, worklessness, health, education and skills, crime, barriers to housing and services, and the living environment.

1.4.2 Detailed small area multiple deprivation analysis based on the IMD 2004 modelled down to Output Area (OA) level³ indicates that there are no extremely deprived areas in Grundisburgh with no areas ranked among the most deprived 20% in the region.

1.5 Low Income

1.5.1 People living on a low income are among the most deprived groups in society. A person or household living on a low income may be out of work, or in work but on low pay.

1.6 Employment and Enterprise

1.6.1 Being out of work can have a severe impact on an individual's quality of life - both in terms of the economic implications and in terms of the wider social exclusion implications. The impacts will be felt not only by the individual, but also by partners and dependent children.

1.7 Health

1.7.1 Health is a fundamental determinant of quality of life, having a direct impact on an individual's ability to live a fulfilling and enjoyable life and also indirectly impacting on their ability to

sustain standards of living through income. Ill health may also have a severe effect on other people, either directly through changing relationships (for example forcing people into informal unpaid care), or through indirect effects such as change in household income.

1.8 Education and Skills

1.8.1 Improving the level of education and skills present within a local population remains an important policy objective for both local and central government. The task of implementing initiatives to improve life-long learning and enhance individual development (and employability) represents a significant and essential challenge for local authorities.

1.10 Access to Services

1.10.1 Access to services is a major factor in quality of life for people and communities. People are at risk from social exclusion where necessary services such as food shops and post offices are not easily accessible. This is especially likely to present difficulties for people whose mobility is limited, are unable to drive, or in areas where public transportation is poor.
